

Green Plant Organic Fertilizer Sdn Bhd

Company Profile

Green Plant Organic Fertilizer Sdn Bhd is a subsidiary company of **Havys Oil Mill Sdn Bhd**. The company was incorporated in 2010 to focus in processing palm oil mill's industrial waste. The waste products were mixed using a special formulation developed by the company, together with a scientifically formulated biological cocktail (**BioPlus Activator**) that consists of super strain microbes to produce supreme grade palm-based living organic fertilizer.

The company is also collaborating with the world-leading university , **The University of Nottingham Malaysia Campus** to research and improve the quality of our fertilizer.
